Overview

This presentation by Dr. Evans was one of the two keynote addresses that were invited to the 6th Southern Forestry and Natural Resources GIS Conference by the conference planning committee. As a result, no abstract is available. However, Dr. Evans presented a number of thoughts on the status and development of LiDAR in natural resource management, as well as a few innovative methods for visualizing LiDAR data.

In Proceedings of the 6th Southern Forestry and Natural Resources GIS Conference (2008), P. Bettinger, K. Merry, S. Fei, J. Drake, N. Nibbelink, and J. Hepinstall, eds. Warnell School of Forestry and Natural Resources, University of Georgia, Athens, GA.
